## Weekly E-Newsbrief

November 24, 2004

The E-Newsbrief of the National Clearinghouse is a free weekly newsletter focusing on new developments in the world of worker health and safety. Each issue provides summaries of the latest worker health and safety news from newspapers, magazines, journals, government reports, and the Web, along with links to the original documents. Also featured each week are updates from government agencies that handle hazmat and worker safety issues such as DOE, EPA, OSHA and others.

[Subscribing](#) to the National Clearinghouse Newsbrief is the best way to stay on top of the worker health and safety news.

The conference was sponsored by the National Institute for Occupational Safety and Health of the U. S. Centers for Disease Control and Prevention which also arranged for RAND to organize and conduct the conference and prepare this report. Improve federal education and training programs and activities directed at the health and safety of emergency responders. The report should also help state and municipal officials trade union leaders industry executives and researchers obtain a better.

# nanotech research: TSDS

- Got hazard communication identified as an important area of research for federal government to fund
- The research document cites Technology Safety Data Sheets as example

## Technology Safety Data Sheet Porter-Cable Circular Saw (OENHP #: 2001-04, Version A)

### Section 1: Technology Identity

Technology Name(s):		Emergency Contact:
Porter-Cable Circular Saw		1-800-4US-TOOL
Manufacturer's Name and Address:		Information Contact:
Porter-Cable Corporation 4825 Highway 45 North Jackson, TN 38305		1-800-4US-TOOL
Date Prepared:	TSDS Version Number:	Prepared By:
8/23/01	2001-04, Version A	John Kovach, MS; Jeana Harrison; Aaron Ondo, MS; Bruce Lippy, CIH, CSP

### Section 2: Technology Description

The Porter-Cable circular saw is a handheld tool with a 7 1/4 inch diameter blade. The saw contains a fixed upper and a retractable lower blade guard to prevent access to the blade during operation. The maximum cutting depth is approximately 2 1/2 inches. The unit is operated with an on/off guarded trigger switch and is supported with a handgrip mounted near the front of the saw. The saw is equipped with a directional nozzle, which aims sawdust away from the operator and the line of cut. An optional vacuum system, attached to the directional nozzle, was used to remove and collect dust. An adjustable lever sets the depth of cut. The retractable blade guard permits blind or plunge cuts and protects from blade access during shutdown and blade coast. Blade changes are accomplished using a blade lock button to hold the blade firm while removing the retaining bolt.

### Section 3: Technology Pictures

Figure 1. An operator making a vertical cut with the Porter-Cable Circular Saw. For this demonstration, the optional vacuum was attached to the directional nozzle.

Graniteville Train  
Derailment  
January 6, 2005**

1/6/2005

## Background on Rail Hazards (CDC, MMWR 1-28-05)

- 4300 daily shipments of hazmat by rail
- Rail events = 2% total hazmat releases
- 75% of releases were < 70 gallons
- 10% of releases were > 2,200 gallons
- 93% involved only one chemical
- Most common releases:
  - Sulfuric acid
  - Sodium hydroxide
  - Hydrochloric acid
